

Dear Customer,

bodahl
LIVING CULTURE

We are pleased to have delivered our beautiful rustic oak tabletop to you.

To ensure that your tabletop remains in perfect condition and retains its natural beauty for many years, it is important to follow these care instructions:

Cleaning:

- Use a soft, damp cloth to wipe the tabletop and remove dust and dirt.
- Avoid using harsh cleaning agents or abrasive sponges, as these can damage the lacquered surface and alter the appearance of the tabletop.

Protection from heat and moisture:

- Always use coasters or trivets under hot pots, plates, or cups to prevent heat damage or condensation rings.
- Wipe up spilled liquids immediately to prevent stains or damage to the lacquered surface.

General maintenance:

- Since the surface treatment already includes lacquer, no additional treatment with oil or lacquer is necessary.
- Avoid placing sharp objects directly on the tabletop, as they can scratch the lacquered surface.

Long-term care:

- Be mindful of environmental factors such as direct sunlight and excessive humidity, as these can affect the condition and durability of the wood over time.
- Follow the above guidelines for cleaning and maintaining your wooden tabletop.

By following these simple yet important guidelines, you can enjoy your rustic oak tabletop for many years while preserving its natural beauty and durability.

We hope you will enjoy your new, unique piece of furniture.

Best regards,
Team BODAHL
